Technical Memorandum

То:	William Earle	From:	David Homer
Company:	SulTRAC	Date:	October 14, 2011
Re:	Ecological Habitat Assessment Protocol Lusher Street Site, Elkhart, IN	Project #:	103G1852136
CC:	Cheryl Gorman, SulTRAC	_	

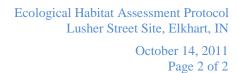

1.0 Introduction

The purpose of the habitat evaluation is to gather data necessary to identify potential ecological receptors and develop a conceptual site model (CSM) for the ecological risk assessment (ERA) to be conducted for the site. Specifically, SulTRAC will evaluate the following parameters: (1) water features and wetlands, (2) habitat types, (3) sensitive environments, (4) soils and land use, and (5) wildlife species.

2.0 Methods

To obtain the necessary information about the habitats at the site, the following activities will be conducted

- Obtain the necessary maps for the site
- Note and describe any water bodies and potential wetlands (no formal wetland delineation will be done at this time, the extent of the potential wetland will be identified)
- Identify and map any evidence indicating contamination or potential contamination e.g. stressed vegetation
- Describe existing aquatic, terrestrial, and wetland ecological habitats and estimate area covered by those habitats
- Note any potential sensitive environments

- Describe and if possible map soil and water types, land uses, and the dominant vegetation species
 present
- Record any observation of animal species or signs of a species

The habitat assessment team will use the "Checklist for Ecological Assessment," from U.S. EPA's Ecological Risk Assessment Guidance for Superfund (EPA 1997) to guide the process (attached). The checklist will be augmented with photographs and field notes to fully document the site's habitat.

ATTACHMENT - Checklist for Ecological Assessment

APPENDIX A - CHECKLIST FOR ECOLOGICAL ASSESSMENT/SAMPLING

Introduction

The checklist that follows provides guidance in making observations for an ecological assessment. It is not intended for limited or emergency response actions (e.g., removal of a few drums) or for purely industrial settings with no discharges. The checklist is a screening tool for preliminary site evaluation and may also be useful in planning more extensive site investigations. It must be completed as thoroughly as time allows. The results of the checklist will serve as a starting point for the collection of appropriate biological data to be used in developing a response action. It is recognized that certain questions in this checklist are not universally applicable and that site-specific conditions will influence interpretation. Therefore, a site synopsis is requested to facilitate final review of the checklist by a trained ecologist.

Checklist

The checklist has been divided into sections that correspond to data collection methods and ecosystem types. These sections are:

- I. Site Description
 - IA. Summary of Observations and Site Setting
- II. Terrestrial Habitat Checklist
 - IIA. Wooded
 - IIB. Shrub/Scrub
 - IIC. Open Field
 - IID. Miscellaneous
- III. Aquatic Habitat Checklist -- Non-Flowing Systems
- IV. Aquatic Habitat Checklist -- Flowing Systems
- V. Wetlands Habitat Checklist

Checklist for Ecological Assessment/Sampling

I. SITE DESCRIPTION

1.	Site Name:
	Location:
	County:State:
2.	Latitude: Longitude:
3.	What is the approximate area of the site?
4.	Is this the first site visit? \square yes \square no If no, attach trip report of previous site visit(s), if available. Date(s) of previous site visit(s):
5.	Please attach to the checklist USGS topographic map(s) of the site, if available.
6.	Are aerial or other site photographs available? \square yes \square no If yes, please attach any available photo(s) to the site map at the conclusion of this section.

7.	The land use on the site is:	The area surrounding the site is: mile radius
	% Urban	% Urban
	% Rural	% Rural
	% Residential	% Residential
	% Industrial (\square light \square heavy)	% Industrial (\square light \square heavy)
	% Agricultural	% Agricultural
	(Crops:)	(Crops:)
	% Recreational	% Recreational
	(Describe; note if it is a park, etc.)	(Describe; note if it is a park, etc.)
	% Undisturbed	% Undisturbed
	% Other	% Other
8.	Has any movement of soil taken place at the site? \Box disturbance:	yes \square no. If yes, please identify the most likely cause of this
	Agricultural Use Heavy Equip	oment Mining
	Natural Events Erosion	Other
	Please describe:	

9.	Do any potentially sensitive environmental areas exist adjacent to or in proximity to the site, e.g., Federal and State parks, National and State monuments, wetlands, prairie potholes? <i>Remember, flood plains and wetlands are not always obvious; do not answer "no" without confirming information.</i>		
	Please provide the source(s) of information used to identify these sensitive at on the site map.	eas, and indicate their general location	
10.	0. What type of facility is located at the site?		
	☐ Chemical ☐ Manufacturing ☐ Mixing ☐ Waste dispos	al	
	☐ Other (specify)		
	 What are the suspected contaminants of concern at the site? If known, what a Check any potential routes of off-site migration of contaminants observed at 		
		inage ditches	
	□ Runoff □ Windblown particulates □ Vehicular tra		
	☐ Other (specify)		
13.	3. If known, what is the approximate depth to the water table?		
14.	4. Is the direction of surface runoff apparent from site observations? ☐ yes ☐ does the surface runoff discharge? Indicate all that apply.	no If yes, to which of the following	
	\square Surface water \square Groundwater \square Sewer \square Col	lection impoundment	
15.	5. Is there a navigable waterbody or tributary to a navigable waterbody?	□ yes □ no	

16.	Is there a waterbody anywhere on or in the vicinity of the site? If yes, also complete Section III: Aquatic Habitat Checklist Non-Flowing Systems and/or Section IV: Aquatic Habitat Checklist Flowing Systems.		
	☐ yes (approx. distance	_)	□ no
17.	Is there evidence of flooding? \square yes \square no Wetla without confirming information. If yes, complete		Glood plains are not always obvious; do not answer "no" V: Wetland Habitat Checklist.
18.	If a field guide was used to aid any of the identification identifying fauna. [Use a blank sheet if additional		lease provide a reference. Also, estimate the time spent needed for text.]
19.			mal) known to inhabit the area of the site? \square yes \square no $U.S.$ Fish and Wildlife Service. If species' identities are
20.	Record weather conditions at the time this check	list was pı	repared:
	DATE:		
	Temperature ($^{\circ}$ C/ $^{\circ}$ F)		Normal daily high temperature
	Wind (direction/speed)		Precipitation (rain, snow)
	Cloud cover		

IA. SUMMARY OF OBSERVATIONS AND SITE SETTING Completed by______ Affiliation_____ Additional Preparers_____ Site Manager_____ Date_____

II. TERRESTRIAL HABITAT CHECKLIST

IIA. WOODED

1.	Are there any wooded areas at the site? \square yes \square no If no, go to Section IIB: Shrub/Scrub.
2.	What percentage or area of the site is wooded? (% acres). Indicate the wooded area on the site map which is attached to a copy of this checklist. Please identify what information was used to determine the wooded area of the site.
3.	What is the dominant type of vegetation in the wooded area? (Circle one: Evergreen/Deciduous/ Mixed) Provide a photograph, if available.
	Dominant plant, if known:
4.	What is the predominant size of the trees at the site? Use diameter at breast height.
	\square 0-6 in. \square 6-12 in. \square > 12 in.
5.	Specify type of understory present, if known. Provide a photograph, if available.
IIB	. SHRUB/SCRUB
1.	Is shrub/scrub vegetation present at the site? \square yes \square no If no, go to Section IIC: Open Field.
2.	What percentage of the site is covered by scrub/shrub vegetation? (% acres). Indicate the areas of shrub/scrub on the site map. Please identify what information was used to determine this area.
3.	What is the dominant type of scrub/shrub vegetation, if known? Provide a photograph, if available.
4.	What is the approximate average height of the scrub/shrub vegetation?
	\square 0-2 ft. \square 2-5 ft. \square > 5 ft.

5.	Based on site observations, how dense is the scrub/shrub vegetation?				
	□ Dense □ Patchy □ Sparse				
IIC	C. OPEN FIELD				
1.	Are there open (bare, barren) field areas present at the site? \square yes \square no If yes, please indicate the type below:				
	☐ Prairie/plains ☐ Savannah ☐ Old field ☐ Other (specify)				
2.	What percentage of the site is open field? (% acres). Indicate the open fields on the site map.				
3.	What is/are the dominant plant(s)? Provide a photograph, if available.				
4.	What is the approximate average height of the dominant plant?				
5.	Describe the vegetation cover: \Box Dense \Box Sparse \Box Patchy				
IID	IID. MISCELLANEOUS				
1.	Are other types of terrestrial habitats present at the site, other than woods, scrub/shrub, and open field? \Box yes \Box no If yes, identify and describe them below.				
2.	Describe the terrestrial miscellaneous habitat(s) and identify these area(s) on the site map.				

3.	What observations, if any, were made at the site regarding the presence and/or absence of insects, fish, birds, mammals, etc.?
4.	Review the questions in Section I to determine if any additional habitat checklists should be completed for this site.

III. AQUATIC HABITAT CHECKLIST -- NON-FLOWING SYSTEMS

Aquatic systems are often associated with wetland habitats. Please refer to Section V, Wetland Habitat Note: Checklist. 1. What type of open-water, non-flowing system is present at the site? ☐ Natural (pond, lake) ☐ Artificially created (lagoon, reservoir, canal, impoundment) 2. If known, what is the name(s) of the waterbody(ies) on or adjacent to the site? 3. If a waterbody is present, what are its known uses (e.g.: recreation, navigation, etc.)? 4. What is the approximate size of the waterbody(ies)? _____ acre(s). 5. Is any aquatic vegetation present? \square yes \square no If yes, please identify the type of vegetation present if known. ☐ Emergent ☐ Submergent ☐ Floating 6. If known, what is the depth of the water? 7. What is the general composition of the substrate? Check all that apply. ☐ Sand (coarse) □ Bedrock ☐ Muck (fine/black) \square Boulder (>10 in.) ☐ Silt (fine) ☐ Debris ☐ Cobble (2.5-10 in.) ☐ Marl (shells) ☐ Detritus \square Gravel (0.1-2.5 in.) ☐ Clay (slick) ☐ Concrete ☐ Other (specify)_____ 8. What is the source of water in the waterbody? ☐ Other (specify)_____ ☐ River/Stream/Creek ☐ Groundwater ☐ Industrial discharge ☐ Surface runoff

9.	Is there a discharge from the site to the waterbody? \square yes \square no If yes, please describe this discharge and its path.			
10.		m the waterbody? \Box year into which the waterbo		d the information is available, identify from the list
	☐ River/Stream/Creek	\Box onsite	\Box offsite	Distance
	☐ Groundwater	\Box onsite	\Box offsite	
	☐ Wetland	\Box onsite	\Box offsite	Distance
	☐ Impoundment	\Box onsite	\Box offsite	
11.		surements and observation observation of the measurement and observations.		that were made. For those parameters for which asure below:
		Area		
		Depth (average)		
	Temperature (depth of the water at which the reading was taken)			
	pH			
	Dissolved oxygen			
	Salinity			
	Turbidity (clear, slightly turbid, turbid, opaque) (Secchi disk depth)			paque) (Secchi disk depth)
		Other (specify)		
12.	Describe observed colo	or and area of coloration	n.	
13.	Mark the open-water, i	non-flowing system on	the site map attache	d to this checklist.

14.	4. What observations, if any, were made at the waterbody regarding the presence and/or absence of benthic macroinvertebrates, fish, birds, mammals, etc.?		

IV. AQUATIC HABITAT CHECKLIST -- FLOWING SYSTEMS

Note:

Checklist. 1. What type(s) of flowing water system(s) is (are) present at the site? ☐ River ☐ Stream ☐ Creek ☐ Dry wash ☐ Arroyo □ Brook ☐ Intermittent Stream ☐ Channeling ☐ Artificially created ☐ Other (specify)_____ (ditch, etc.) 2. If known, what is the name of the waterbody?_____ 3. For natural systems, are there any indicators of physical alteration (e.g., channeling, debris, etc.)? \square yes \square no If yes, please describe indicators that were observed. 4. What is the general composition of the substrate? Check all that apply. ☐ Bedrock ☐ Sand (coarse) ☐ Muck (fine/black) \Box Boulder (>10 in.) \square Silt (fine) □ Debris □ Cobble (2.5-10 in.) ☐ Marl (shells) ☐ Detritus ☐ Gravel (0.1-2.5 in.) ☐ Clay (slick) ☐ Concrete ☐ Other (specify)_____ 5. What is the condition of the bank (e.g., height, slope, extent of vegetative cover)?

6. Is the system influenced by tides? \square yes \square no What information was used to make this determination?

Aquatic systems are often associated with wetland habitats. Please refer to Section V, Wetland Habitat

7.	Is the flow intermitten	t? \square yes \square no If yes, please note the information that was used in making this determination.
8.	Is there a discharge from	om the site to the waterbody? \square yes \square no If yes, please describe the discharge and its path.
9.		om the waterbody? \square yes \square no If yes, and the information is available, please identify what ges to and whether the discharge is on site or off site.
10.		surements and observations of water quality that were made. For those parameters for which rovide the measurement and the units of measure in the appropriate space below:
		Width (ft.)
		Depth (ft.)
		Velocity (specify units):
		Temperature (depth of the water at which the reading was taken)
		pH
		Dissolved oxygen
		Salinity
		Turbidity (clear, slightly turbid, turbid, opaque) (Secchi disk depth)
		Other (specify)

11.	Describe observed color and ar	ea of coloration.	
10	T	-49 🗆 🗆 If1	:1: :61 :61
12.	is any aquatic vegetation preser	nt? \square yes \square no II yes, plea	se identify the type of vegetation present, if known.
	☐ Emergent	☐ Submergent	☐ Floating
		_ ~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~	
13.	Mark the flowing water system	on the attached site map.	
1/1	4 Wilest all a marking and a state and all a marked and a state an		
14.	4. What observations were made at the waterbody regarding the presence and/or absence of benthic macroinvertebrates, fish, birds, mammals, etc.?		
	inactorii (errectates, risii, erres,		

V. WETLAND HABITAT CHECKLIST

l.	1. Based on observations and/or available \square yes \square no	nformation, are de	signated or known wetlands definitely present at the site?		
	Please note the sources of observations Inventory, Federal or State Agency, etc.		ed (e.g., USGS Topographic Maps, National Wetland mination.		
2.	Based on the location of the site (e.g., along a waterbody, in a floodplain) and site conditions (e.g., standing water; dark, wet soils; mud cracks; debris line; water marks), are wetland habitats suspected? \square yes \square no If yes, proceed with the remainder of the wetland habitat identification checklist.				
3. What type(s) of vegetation are present in the wetland?					
	☐ Submergent☐ Scrub/Shrub	☐ Emergent☐ Wooded			
	☐ Other (specify)				
1.		Provide a general description of the vegetation present in and around the wetland (height, color, etc.). Provide a photograph of the known or suspected wetlands, if available.			
5.	Is standing water present? ☐ yes ☐ no If yes, is this water: ☐ Fresh ☐ Brackish What is the approximate area of the water (sq. ft.)? Please complete questions 4, 11, 12 in Checklist III - Aquatic Habitat Non-Flowing Systems.				
	riease complete questions 4, 11, 12 in C	neckiist III - Aqua	uc naonai non-riowing Systems.		
5.	5. Is there evidence of flooding at the site?	Is there evidence of flooding at the site? What observations were noted?			
	☐ Buttressing ☐ Wat	er marks	☐ Mud cracks		
	☐ Debris line ☐ Otho	er (describe below)			

7.	If known, what is the source of the water in the wetland?			
	☐ Stream/River/Creek/Lake/Pond	☐ Groundwater		
	☐ Flooding	☐ Surface Runoff		
8.	Is there a discharge from the site to a known or su	spected wetland? □ yes □ no If yes, please describe.		
9.	Is there a discharge from the wetland? \square yes \square no. If yes, to what waterbody is discharge released?			
	☐ Surface Stream/River ☐ Groundwater	☐ Lake/Pond ☐ Marine		
10.	If a soil sample was collected, describe the appearance of the soil in the wetland area. Circle or write in the bes response.			
	Color (blue/gray, brown, black, mottled)			
	Water content (dry, wet, saturated/unsaturated) _			
11.	Mark the observed wetland area(s) on the attached	l site map.
